

# Audio Investigation Revolutionized

**Investigate audio recordings effortlessly with **Phonexia Orbis**.**

Automatically identify speakers and other key information in audio and organize, listen, and report on the findings with just a few clicks, all from one place.

### **Resolve Cases Faster**

Put extracted information into context quickly. Phonexia Orbis is designed with an investigator in mind and focuses on effortless note taking, highly organized asset management, and straightforward reporting to link uncovered information together fast.

### **Eliminate Tiresome Routine**

Do not waste time on listening to every single audio recording manually. Instead, leave this routine work to Phonexia Orbis, and its technologies will highlight the parts of interest for you, allowing you to spend energy only on those most relevant recordings.

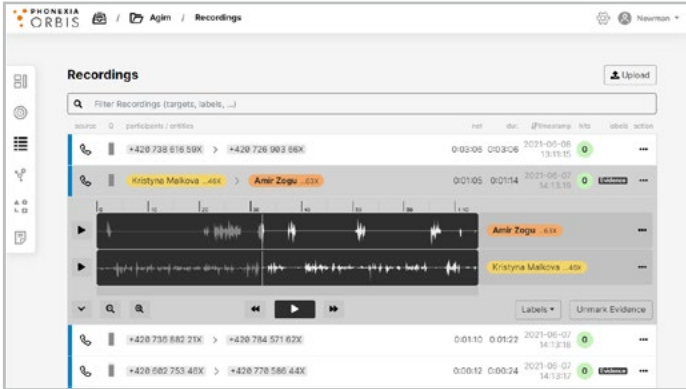

### **Analyze Key Findings First**

Stay laser focused. Phonexia Orbis displays audio recordings based on their relevance derived from multiple criteria so you can quickly grasp the context and connect all the necessary dots, progressing from the most-related recording to the least.

# Designed for Law Enforcement Agencies

Designed specifically for law enforcement agencies, **Phonexia Orbis** is a revolutionary on-premise software solution that enables the rapid investigation of audio recordings. Powered by Phonexia's state-of-the-art technologies for voice biometrics and speech recognition, the solution uncovers all important information from audio instantly and provides investigators with a modern, intuitive interface for managing case-specific notes, performing further analyses and visualizations, and creating reports.

## Innovative Audio Analysis

Uncover the parts of interest instantly with automatic analysis of an entire set of audio recordings with Phonexia's cutting-edge, AI-powered voice biometrics and speech technologies.

## Detection of Identical Voices

Never miss a person of interest's voice with the automatic detection of the same voice biometrics patterns across the investigated set of audio recordings that groups identical voices together.

## Smart Audio Player

Audio recordings do not contain 100% of speech from the beginning to end. Phonexia Orbis makes your investigations faster with a smart audio player that detects the speech occurrences for you to listen to.

## Insights Customization

Each case is different and requires a unique approach for it to be solved. Phonexia Orbis allows you to define which insights are the most important for your case, so you can crack it as efficiently as possible.

## Case Network Visualization

Understanding the relationships between the persons of interest can be a great challenge. Phonexia Orbis provides an easy-to-comprehend network map functionality to visualize and report all the links clearly.

## On-Premise Installation

Sensitive data requires exceptional security. Phonexia Orbis is offered as an on-premise software solution that can be installed in your own infrastructure, giving you absolute control over data exposure.

**Solving Everyday Challenges Through Voice**
