

Phonexia Orbis Investigator

Investigate Audio Recordings Effortlessly

Solving Everyday Challenges
Through Voice

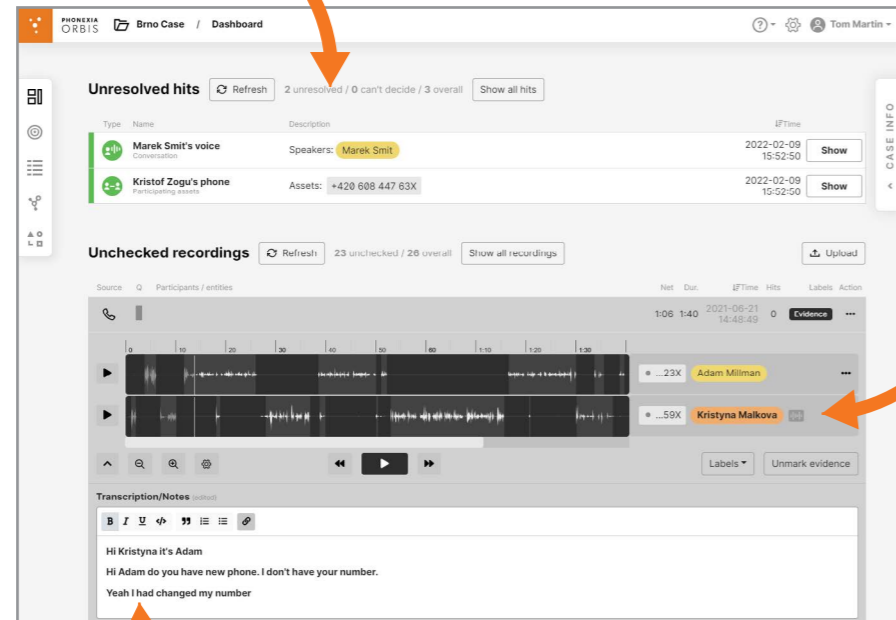

**Have to listen
to audio recordings
manually one by one?**

These days are over.

Automate Your Audio Investigations with AI

What Is Phonexia Orbis Investigator?

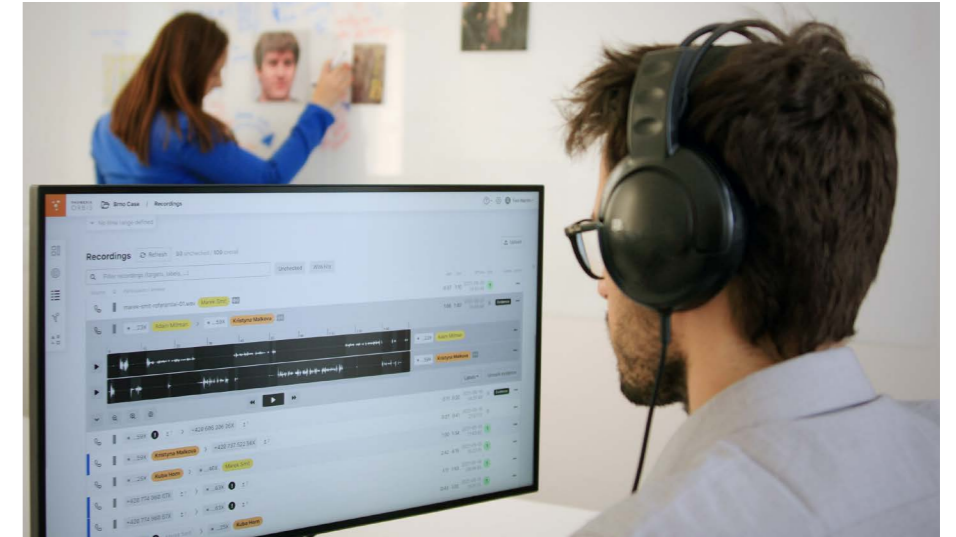

Receive the most relevant findings first

Discover persons of interest by voice

Reveal what is being said in the recordings

An audio investigation revolution. Designed specifically for law enforcement agencies, Phonexia Orbis Investigator is innovative **on-premises software for the rapid investigation of audio recordings**. Powered by Phonexia's state-of-the-art voice biometrics and speech recognition, it uncovers key information in audio instantly and provides investigators with an intuitive interface for performing case-specific analyses and visualizations, managing notes, and creating reports.

Pinpoints What Matters

Each case is unique. Define your own rules about what matters to you the most in a given audio analysis, and Phonexia Orbis Investigator will display all matching findings accordingly.

Eliminates Tiresome Tasks

Do not waste time on irrelevant audio recordings. Phonexia Orbis Investigator analyzes audio recordings for you with its cutting-edge technologies and highlights the parts of interest.

Helps You Resolve Cases Faster

Connect the dots quickly. Phonexia Orbis Investigator is designed with an investigator in mind, offering effortless note-taking, organized asset management, and straightforward reporting.

Key Features

Innovative Voice Biometrics

Detect a person of interest's voice with extreme accuracy throughout an entire set of recordings, regardless of the channel.

Speech Transcription

Find the needle in an audio haystack with a full-text search in the automatically generated speech transcriptions of audio recordings.

Smart Audio Player

Cut through the burden of audio easily with a built-in smart audio player that enables you to listen to key parts of audio instantly.

Insights Customization

Adjust the analytical behavior of Phonexia Orbis Investigator to your case's requirements and always receive key insights first.

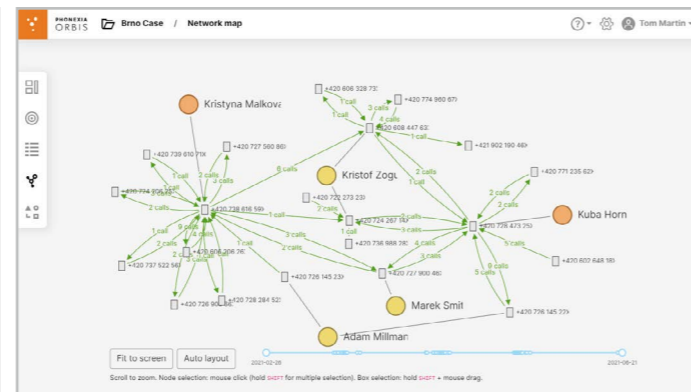

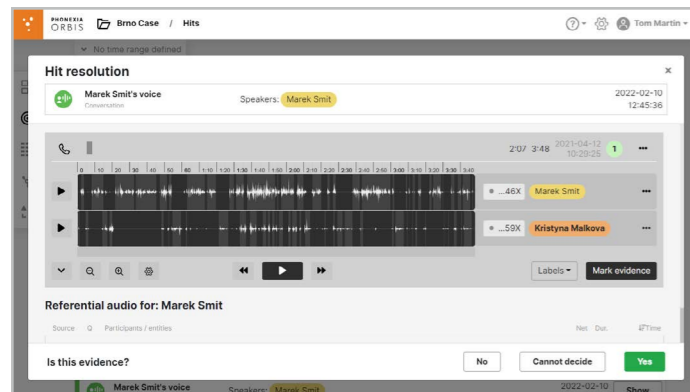

Case Network Visualization

Uncover the full context of the relationships between the persons of interest with a one-click visualization of the case's network.

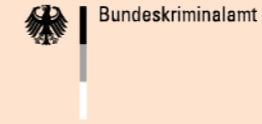

On-Premises Installation

Have absolute control over the security and exposure of sensitive data by installing Phonexia Orbis Investigator in your own infrastructure.

Solving Everyday Challenges Through Voice

Founded in 2006, Phonexia is a Czech software company that solves everyday challenges through cutting-edge voice biometrics and speech recognition. Closely cooperating with the Brno University of Technology, Phonexia is transforming the latest science into the everyday reality of highly advanced solutions used in 60+ countries.
